AWARDS

The Advanced Sustainable Technology International Conference 2024 (ASTECH 2024) presents several prestigious awards to recognize excellence in research, presentation, and innovation within the field of advanced sustainable technology and its related fields. These awards collectively strive to honor and encourage exceptional achievements while fostering the development and implementation of sustainable solutions to global challenges. These awards include:

Best Presenter Awards:

The Best Presenter Award acknowledges **the top ten presenters** who demonstrate exemplary communication skills, clarity, and engagement throughout their presentations. The award results from thorough evaluations across 6 (SIX) face-to-face presentation sessions and 4 (FOUR) online sessions. Through these sessions, presenters are not only assessed on their ability to convey complex ideas and research findings effectively but also on their capacity to engage and connect with their audience. This comprehensive evaluation process ensures that recipients of the Best Presenter Award have consistently displayed excellence across various presentation formats, showcasing their proficiency in disseminating knowledge and fostering meaningful dialogue within the realm of advanced sustainable technology.

Best Paper Awards:

This award recognizes **the top three papers** presented at ASTECH 2024. The Conference Best Paper Award will be selected based on the review process of submitted papers. The award is bestowed upon the authors of the presented papers contributing to sustainable technology research and innovation. Selection criteria include scientific significance, originality, and outstanding technical quality. Finalists are selected by the ASTECH 2024 Conference Awards Committee from all accepted and registered papers, with notifications sent before the conference.

The Best Poster Award:

The Best Poster Award aims to recognize outstanding visual presentations that effectively convey research findings, innovative ideas, and contributions to sustainable technology. This award celebrates the creativity, clarity, and impact of poster presentations, highlighting excellence in both content and design. The winner of the Best Poster Award demonstrates exceptional ability to express complex concepts concisely and engagingly, utilizing visual elements, data visualization, and clear messaging to captivate audiences and stimulate discussion. Their poster serves as a powerful tool for knowledge dissemination and inspires further exploration and collaboration in the field of sustainable technology.
